

## **BETTER ROADS MEAN FEWER REPAIRS**

Bad roads cost you money! Driving on roads in need of repair costs Arkansas motorists \$720 million a year in extra vehicle repairs and operating costs – that's \$360 per motorist.

Motor vehicle crashes, many of which can be avoided with improved safety features, cost Arkansas citizens \$2 billion a year - \$735 per resident – in medical costs, lost productivity, travel delay, workplace costs, insurance costs and legal costs.

Traffic congestion costs American motorists more than \$63 billion a year in wasted time and fuel costs.

Any improvements we perform will have immediate impact. A U. S. Department of Transportation study shows that every dollar invested in the nation's highway system yields \$5.40 in economic benefits in reduced delays, improved safety and lower vehicle operating costs.

**Safety - Jobs \$\$\$ - Savings \$\$\$**
